SOURCES OF THE AGRICULTURAL IMPORTS OF THE UNITED STATES, 1896-1900.

INTRODUCTION.

The present bulletin has been prepared for the purpose of bringing down to date the statistics published two years ago in a similar report¹ covering the five-year period 1894-1898.

AGRICULTURAL IMPORTS, BY COUNTRIES.

Among the countries from which the United States purchased agricultural products during 1900, Brazil, the leading source of our coffee supply, stood foremost. Our agricultural imports from Brazil, amounting in value to \$39,287,000, were considerably smaller, however, than in previous years. In 1896, five years ago, importations to the value of \$60,668,000 were received from that country, but since then each annual record has shown a decreasing trade, the figures just quoted for 1900 being the lowest of the past decade.

The United Kingdom ranked next to Brazil as a factor in our agricultural import trade during 1900, the farm produce purchased from that source having a value of \$32,606,000. While these figures show a considerable increase over the imports for 1898 and 1899, they indicate a smaller trade than that enjoyed in 1896 and 1897. The value reported for 1896 was \$35,420,000, and that for 1897, \$49,783,000. Much of the agricultural produce imported from the United Kingdom had its origin in other countries, and especially in the British dependencies, the shipments from the mother country being largely in the nature of reexports.

Agricultural products valued at \$27,500,000 were purchased from the Dutch East Indies during 1900, those islands ranking third among the sources of supply. In the case of the Dutch East Indies there was a marked growth of trade, the import value just quoted for 1900 being nearly double that for 1896, which was recorded at \$14,598,000.

Cuba stood fourth as a contributor to our agricultural import trade in 1900, the produce received from that island amounting in value to \$27,226,000. During the past five years, as was natural under the

¹ Bulletin No. 17, "Sources of the Agricultural Imports of the United States, 1894-1898."

prevailing conditions, our Cuban imports suffered marked fluctuations, the value dropping from \$36,386,000 in 1896 to \$13,158,000 in 1898, and then partly recovering, as indicated by the figures for 1900.

Germany was the fifth country in importance, supplying agricultural imports that had a value of \$26,049,000. These figures were the largest of the past five years, excepting the record for 1897, which amounted to \$41,358,000. In comparison with the figures for 1896, recorded at \$22,523,000, they show a considerable increase.

Our agricultural imports from Japan increased quite noticeably during the last few years, advancing from \$18,382,000 in 1896 to \$24,767,000 in 1900. The value for the latter year was the highest ever recorded, and made that country sixth in rank among the sources of our agricultural import trade.

The Chinese Empire stood seventh in this regard. Our agricultural imports from China almost kept pace with those from Japan, the value returned for 1900 being \$24,131,000, as compared with only \$18,649,000 for 1896.

From France we purchased farm produce worth \$21,052,000 in 1900, that country ranking eighth in importance. The figures for 1900 were the largest of the period under consideration, although nearly equaled in 1897. Compared with the record for 1896, which amounted to \$17,758,000, they exhibit a noticeable gain.

Unusually large shipments of agricultural produce were received from Hawaii during 1900, the value amounting to \$20,638,000, which was decidedly in excess of any previous record. Our agricultural imports from the islands during 1896 were valued at only \$11,710,000. In 1900 Hawaii stood ninth among the sources of supply.

Italy furnished agricultural produce to the value of \$20,529,000 in 1900, ranking tenth in importance. There was a considerable gain also in the imports from this country, the value for 1896 amounting to only \$15,958,000. The imports from Italy during 1900, like those from Hawaii, were in excess of any previously reported.

Another country from which the United States received agricultural imports worth over \$20,000,000 in 1900 was Mexico, which furnished us with farm produce to the value of \$20,002,000. The importations from Mexico increased rapidly during the five years, the record for 1896 being only \$12,751,000.

After the eleven sources just enumerated the largest import records of 1900 were made in our trade with the British East Indies and the British West Indies. The past five years have witnessed a considerable growth in the amount of agricultural produce received from each of these sources, the importations from the British East Indies increasing in value from \$9,029,000 in 1896 to \$19,581,000 in 1900, and those from the British West Indies showing an advance during the same period from \$8,891,000 to \$10,507,000.

Other sources from which we received agricultural imports exceed-

ing \$5,000,000 in value during 1900 were Canada, Egypt, the Netherlands, Argentina, the Philippine Islands, and Venezuela.

SUMMARY STATEMENT, BY COUNTRIES, OF TOTAL AGRICULTURAL IMPORTS.

In the following summary statement official¹ statistics are presented as to the value of the agricultural products imported into the United States from the various countries of supply during each year from 1896 to 1900, inclusive:

AGRICULTURAL IMPORTS, BY CONTINENTS.

The statistics presented in the following table show the value of the agricultural produce imported into the United States from the several continents during each of the five years 1896-1900:

From the above table it will be seen that Europe was decidedly the most important source of our agricultural imports for 1900, the farm produce received from that continent amounting in value to \$129,000,000. With the exception of 1897, when the various countries of Europe sent us agricultural products worth \$152,000,000, the figures for 1900 were the largest in recent years. Compared with the value for 1896, amounting to \$116,000,000, they show a decided increase.

Next to Europe, Asia was the continent that contributed most to our agricultural import trade for 1900. The importations from that source have grown with great rapidity during the past five years, advancing in value from \$66,000,000 in 1896 to \$101,000,000 in 1900. The growth was particularly marked in the last-mentioned year, during which a gain of about \$25,000,000 occurred.

A marked increase also took place in our agricultural imports from Oceania during the period under consideration, the year 1900 showing a record of \$31,000,000, as compared with only \$22,000,000 for 1896.

Our imports of farm produce from North American countries in 1900 were valued at \$83,000,000. While these figures show a gain over the records of the three years immediately preceding, they are somewhat less than the value reported for 1896, which amounted to \$85,000,000.

The principal falling off in our agricultural imports from the several continents occurred in the trade with South America, the record for 1900 being only \$66,000,000, as against \$93,000,000 for 1896. Excepting the year 1899, when the value fell to \$64,600,000, the figures for 1900 were the lowest of the five-year period.

Our agricultural imports from Africa during the years 1896-1900 were decidedly smaller than from any other continent. They declined from \$10,400,000 in 1896 to \$6,700,000 in 1898, but advanced again during 1899 and 1900, reaching \$10,600,000 in the latter year.

AGRICULTURAL IMPORTS, BY PRINCIPAL ARTICLES.

Among our agricultural imports for 1900 there were twelve items with values exceeding \$5,000,000, as follows: Sugar, hides and skins, coffee, silk, vegetable fibers, wools, fruits and nuts, tobacco, tea, wines, vegetable oils, and cocoa.

Following is a table that shows the value of these leading items for each of the five years 1896-1900:

Value of the agricultural imports of the United States, by principal articles and groups, during each fiscal year from 1896 to 1900, inclusive.

SUGAR.

The Dutch East Indies, Hawaii, Cuba, and Germany were the sources from which the United States procured most of the sugar imported during 1900. Our purchases from the Dutch East Indies were exceptionally large, amounting to \$24,170,000. Hawaii furnished \$20,392,000 worth, Cuba \$18,244,000 worth, and Germany \$12,347,000 worth. After these four leading sources, our largest importations came from the British West Indies, British Guiana, Santo Domingo, and Porto Rico. The consignments received from the British West Indies were valued at \$4,603,000, and those from British Guiana at \$3,779,000. Santo Domingo supplied \$3,365,000 worth, and Porto Rico \$2,450,000 worth. Austria-Hungary, Egypt, Brazil, and Peru were the only other countries contributing imports valued above \$1,000,000.

HIDES AND SKINS.

Our largest imports of hides and skins during 1900 came from the British East Indies, the United Kingdom, France, Germany, and Argentina. The British East Indies furnished unusually heavy shipments in that year, the value amounting to \$10,731,000. From the United Kingdom, which ranked second as a source of supply, we received imports worth \$7,253,000. France sent consignments worth \$5,380,000. From Germany we imported to the value of \$4,714,000 and from Argentina to the value of \$4,236,000. Other countries from which we received shipments of considerable importance were European Russia, Brazil, Mexico, and China. The importations from European Russia were valued at \$2,616,000, those from Brazil at \$2,507,000, and those from Mexico at \$2,380,000. Our purchases from the Chinese Empire were much larger than in previous years, having a value of \$2,137,000. The only additional sources from which we received imports worth above \$1,000,000 were Venezuela, Canada, Uruguay, and Aden.

COFFEE.

Our supply of coffee is derived chiefly from Brazil. The importations from that country during 1900 amounted in value to \$33,905,000. Aside from Brazil, the principal sources were Venezuela, Mexico, the Dutch East Indies, Guatemala, Costa Rica, and Colombia. Venezuela furnished consignments to the value of \$3,533,000, and Mexico to the value of \$3,313,000. From the Dutch East Indies we purchased \$2,936,000 worth, and from Guatemala \$2,089,000 worth. The imports from Costa Rica were valued at \$1,478,000, and those from Colombia at \$1,398,000. After the several countries mentioned, our largest importations in 1900 came from Salvador, that country sending shipments worth \$570,000.

SILK.

Japan, China, and Italy supplied most of the silk used in the United States. Our imports from Japan during 1900 were valued at \$19,715,000, and those from China at \$12,367,000. Italy's consignments for that year had a value of \$10,817,000. The only other country of much importance in this trade was France, from which source we received imports worth \$2,088,000.

VEGETABLE FIBERS.

Mexico was the most important source of the vegetable fibers imported into the United States in 1900, the value of the shipments received from that country being \$12,113,000. Other leading sources were Egypt, the Philippine Islands, the United Kingdom, and the British East Indies. From Egypt we imported to the value of \$6,157,000, and from the Philippine Islands to the value of \$5,019,000. The United Kingdom furnished consignments worth \$4,947,000, and the British East Indies consignments worth \$3,481,000.

WOOLS.

A considerable portion of the wool imported by the United States during 1900 was purchased in the British markets, our importations from the United Kingdom having a value of \$7,688,000. British Australasia, from which we received consignments worth \$2,968,000, was second in importance among the sources of supply. Argentina ranked third in this regard, sending shipments to the value of \$2,675,000. From China we imported \$2,157,000 worth, and from European Russia \$1,680,000 worth. After these countries our largest imports came from Asiatic Turkey, the value being \$620,000.

FRUITS AND NUTS.

Our imports of fruits and nuts during 1900 were received chiefly from Italy, the British West Indies, Spain, Costa Rica, Colombia, and France. Italy, the principal source of supply, contributed shipments worth \$4,540,000. From the British West Indies we imported to the value of \$3,330,000, and from Spain to the value of \$2,053,000. Our purchases from Costa Rica amounted to \$1,318,000, those from Colombia to \$1,251,000, and those from France to \$1,236,000. After the countries mentioned, Greece sent the largest shipments, the value being \$967,000.

TOBACCO.

Over one-half of our tobacco imports for 1900 came from Cuba, the shipments furnished by that island having a value of \$7,616,000.

Next to Cuba, the Netherlands formed the principal source of supply, our purchases in the markets of that country amounting to \$4,569,000. The imports from other countries were comparatively small, those received from Canada, with a value of \$293,000, being the most important.

TEA.

China and Japan furnished most of the tea imported into the United States during 1900. The consignments received from China were valued at \$4,873,000, and those from Japan at \$4,372,000. After the two principal sources mentioned, our largest imports came from the British East Indies, which sent shipments worth \$549,000.

WINES.

A large part of the wines imported in 1900 came from France, that country supplying shipments to the value of \$4,845,000. From Germany, which ranked second as a source of supply, we imported \$1,179,000 worth. Spain sent the next largest shipments, our imports from that country having a value of \$539,000.

VEGETABLE OILS.

Our imports of vegetable oils during 1900 had their origin chiefly in the United Kingdom, France, Italy, and the British East Indies. From the United Kingdom we imported \$1,299,000 worth, and from France \$1,235,000 worth. The shipments received from Italy were valued at \$1,147,000, and those from the British East Indies at \$1,065,000. After these countries, Germany was the principal source of our imports, furnishing consignments worth \$403,000.

COCOA.

The cocoa used in the United States is supplied principally by the British West Indies, Dutch Guiana, Ecuador, and Brazil. During 1900 our imports from the British West Indies amounted in value to \$1,575,000. Dutch Guiana furnished \$818,000 worth, Ecuador \$771,000 worth, and Brazil \$707,000 worth. Of the remaining sources of supply, Portugal was the most important, furnishing shipments to the value of \$540,000.

SOURCES OF AGRICULTURAL IMPORTS, IN DETAIL.

The tables presented on the following pages embrace all the agricultural imports of the United States during the five fiscal years 1896-1900, exhibiting for each article the extent of the annual importations received from the various sources of supply. For convenience in classification, the articles are divided into two groups, consisting,

respectively, of animal matter and vegetable matter. The tables are arranged in two series, the first relating to the values and the second to the quantities of the articles imported. To facilitate comparison, cross references are given from each table of values to the corresponding table of quantities, and vice versa. In some cases, however, values only are given, no returns being made as to quantity. An index to the articles covered by the tables is printed on pages 119-120. The tables are as follows:

Value of the agricultural imports of the United States (animal matter), by articles and countries, during the five fiscal years 1896-1900.
